

# Polish Geological Institute

performed a proficiency test on metals in waste water under supervision by one of the below organisations.

The performance was highly satisfactory.

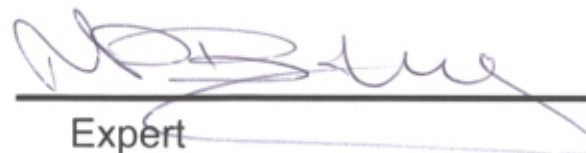

*Setting standards  
in analytical science*

The proficiency test was carried out within the frame of the PRAQ III QI-16 project jointly with:

- Bundesanstalt für Materialforschung- und prüfung (BAM), Berlin, Germany (project co-ordinator)
- LGC Ltd, Teddington, England
- Nederlands Meetinstituut (NMI), Delft, The Netherlands
