Accepted abbreviations used in "The balance of mineral deposits resources in Poland" for a state of a deposit/field development:

- E** – an exploited deposit/field – with a valid exploitation concession; output carried out regularly (annually)
P – a deposit/field covered by preliminary exploration (in C₂ and D categories)
R – a deposit/field covered by detailed exploration (in A+B and C₁ categories)
Z – an abandoned deposit/field – in which exploitation has been given up
T – a deposit/field with a valid exploitation concession, exploited intermittently

***MIDAS - System of management and protection of mineral resources in Poland**

Definitions of resources (According to: the Regulation of the Minister of the Environment of the 1st of July 2015 on a geological documentation of a raw material deposit, excluding a hydrocarbon field (Journal of Laws 2015, Item 987); the Regulation of the Minister of the Environment of the 24th of April 2012 on detailed requirements for deposit development plans (Journal of Laws 2012, Item 511)):

Geological resources (in place) – total mineral resources within a deposit boundaries.

Anticipated economic resources – deposit resources (or part of a deposit) meeting limit values of parameters that define a deposit.

Economic resources (in place) – a part of anticipated economic resources or anticipated sub-economic resources or – in the case of brines, curative and thermal water – exploitable resources, within a projected mining area or a separated deposit part designed for development, that can be a subject of technically and economically justified exploitation upon meeting the law requirements, including environmental restraints.

Limit values of parameters that define a deposit – values of deposit parameters delineating a deposit geological boundaries.
